

Introducing NTX Embedded Quality & Innovation

NTX Embedded is a leader in creating high-performance, rugged display solutions for industrial environments. We are committed to excellence through in-house manufacturing, rigorous quality control, and sustainable practices that ensure our products excel in both functionality and durability.

Unmatched Features of the 10.1-Inch Display

PCAP Touch

Responsive 5-point capacitive touch, operable even with gloves.

Resilient For Harsh Environments

Built to withstand extreme conditions for industrial settings.

High-Performance Backlight

400cd/m² brightness for optimal visibility in various lighting.

Advanced IPS

Full-view direction with a high contrast ratio for clear visuals. gloves.

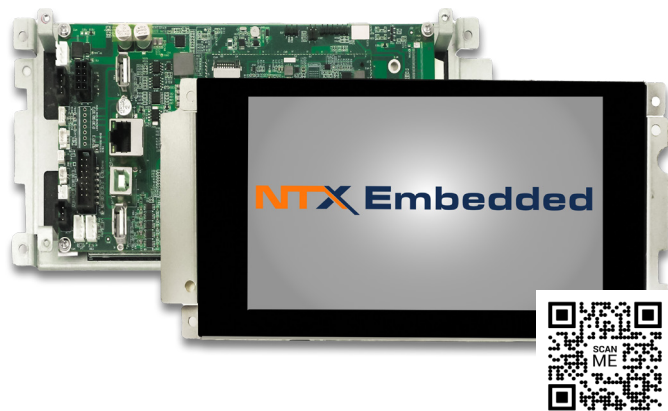

Customization Options

Customizable frames, controls, and power setups for specific needs. gloves.

End-to-End Lifecycle Support

Comprehensive support throughout the product lifecycle. gloves.

10.1-Inch LDVS Display Specifications

- **Resolution:** 1024 x 600 pixels
- **Brightness:** 400 cd/m²
- **Viewing Angle:** full-view (IPS)
- **Contrast Ratio:** 800:1
- **Power Voltage:** 2.8-3.3V for LCD
- **Durability:** 30,000-hour LED life
- **Temperature Range:** Operating from -20°C to +70°C; storage from -30°C to +80°C

TAILORED TO YOUR NEEDS

CUSTOMIZATION OPTIONS

Our displays are designed to meet the unique demands of each industry, offering a range of customization options for precise operational alignment. With multiple frame styles to enhance aesthetics and durability, integrated controls for functional buttons and sound alerts, flexible I/O and power configurations for diverse connectivity, and memory and processing options for enhanced performance, each display is crafted to suit specific

Why Customization Matters

- ✔ **Efficiency:** Tailoring display features to specific workflows enhances productivity.
- ✔ **Cost Savings:** Custom options let you avoid overpaying for unnecessary features.
- ✔ **Precision Fit for Needs:** Ensures a solution precisely aligned with your unique industry demands.

Quality Testing

Displays undergo vibration and extreme temperature testing to meet standards.

Extended Warranty

Available for added assurance in long-term reliability.

Sustainable Practices

Energy-efficient production reflect our commitment to a greener future.

Comprehensive Services & Lifetime Support

NTX Embedded provides comprehensive services to bring your projects from concept to reality.

- **UI/UX Design:** Expert user interface designs for intuitive control.
- **End-to-End Project Management:** From design to delivery, we handle every stage.
- **Lifetime Product Support:** Continuous updates and support to keep your display current with technology.
