

About Us

NTX Embedded is a trusted leader in embedded solutions for industrial applications, offering decades of expertise in developing high-reliability HMI solutions and industrial controls. With a rich history of partnering with equipment manufacturers, we specialize in tailored Display Panels, Control Systems, and Power Systems. Our in-house manufacturing capabilities and global supply chain provide scalable, long-life solutions, ensuring reliable performance to meet your industrial needs.

Precision Motor Solutions

Engineered for industrial-grade reliability and optimized performance.

Industrial Displays and Controllers

Our displays ensure robust functionality in the most demanding environments.

Specialized Metal Fabrication

Ensuring longevity and structural integrity for critical applications.

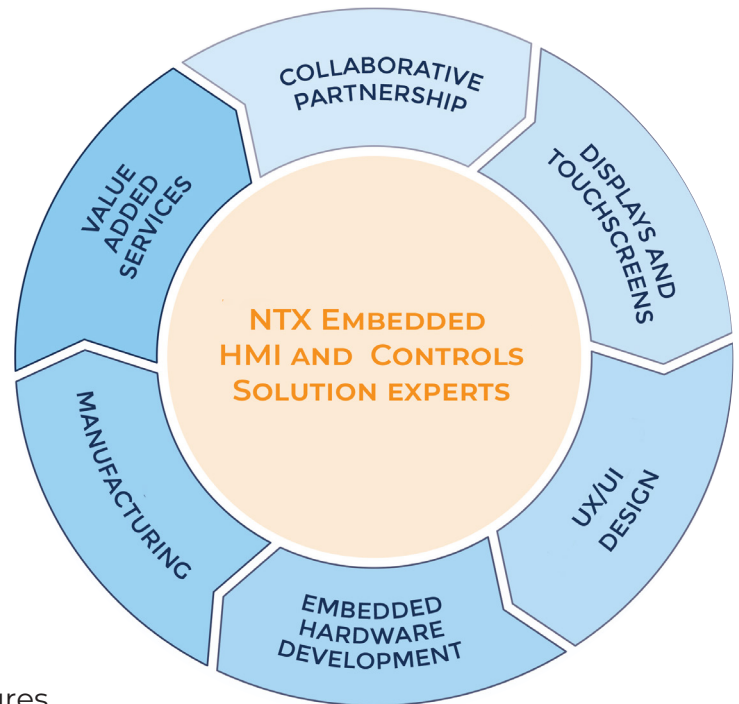

Comprehensive Expertise, All in One Team

- ✔ **Expert Team:** A dedicated group of specialists in digital and power electronics, embedded software, UX/UI design, and system integration..
- ✔ **Agile Development Process:** Delivers rapid personalized results without compromising quality.
- ✔ **In-House Manufacturing:** Enables us to streamline design to production, achieve shorter lead times, optimize cost efficiency, and focus on product quality.
- ✔ **Reliable Partnership:** Locally headquartered team with a proven track record in the North American industrial market.

COMPREHENSIVE SOLUTIONS

Essential Services We Provide

- ✔ **User-Centered Design:** Human-Centric design that simplifies complex tasks for a functional, intuitive experience.
- ✔ **Embedded Software Development:** Robust software tailored for seamless integration and high performance.
- ✔ **Hardware Design:** Custom hardware design, offering innovative, high-performance, and scalable solutions tailored to industry needs.
- ✔ **Project Management & Support:** Comprehensive oversight from concept to launch, adapting to project needs with dedicated support.
- ✔ **Testing & Compliance:** In-house testing ensures certification and reliability for diverse market demands.

Tailored Solutions

Custom designs crafted to meet specific industrial needs, ensuring optimal performance and reliability.

Cost-Efficient

Our integrated approach significantly reduces overhead, consistently delivering high-quality solutions at competitive costs.

Fast Time-to-Market

Streamlined in-house development accelerates production timelines, helping you launch efficiently and effectively.

Partner with NTX Embedded

At NTX Embedded, we don't just create products—we build lasting partnerships that drive success. With our industry-leading expertise, in-house capabilities, and commitment to quality, we bring your vision to life efficiently, cost-effectively, and reliably. Partner with NTX Embedded and experience the advantage of seamless, high-quality solutions built to excel in any environment.
